TEAM NO-CAPP

Issue related to : AIR

Our Issue

Transportation emissions, industrial activity, and wildfire smoke all contribute to air pollution. People develop allergies and become ill as a consequence.

To help people track the

air quality and make

them cautious about their

surroundings

WE PRESENT

Your daily allergy forecast

Our 3 Implementations

Live Air Quality

Our Website/Mobile application will give the live air quality of any area all over the world

Allergy Forecasting

We have created a **pseudo algorithm** which can access the data of the given place and **predict the air quality for the future** and **advise** the user beforehand

AI bot

With good resources our team can generate an AI bot which will use our algorithm and give **user notifications** about the air quality in their live location

LIVE DÉMONSTRATION

- We created an actual website which gives live air quality anywhere all over the world
- Here is a small demonstration

Aahchoo: Your daily allergy forecast

Thank You!
